

# Login Style and Team Page Layout

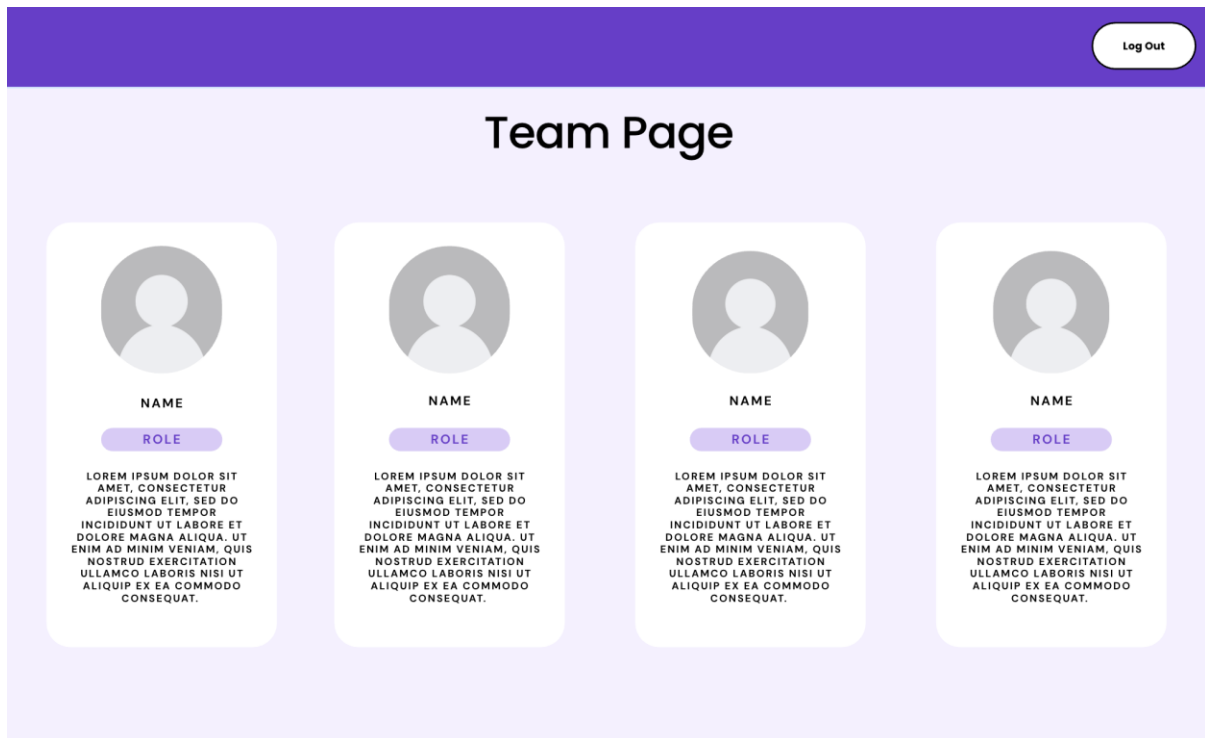

This document presents the proposed UX design for the styled login page and team page. The designs are based on the BA requirements and are intended to provide a consistent visual experience across both pages.

## Login

A mockup of a login page. It features a solid purple header bar at the top. Below the header, the main content area has a light lavender background. Centered in this area is the text "Welcome!" in a large, bold, black font. Directly beneath it is the text "Login to Proceed" in a smaller, regular black font. Below this, there are two input fields. The first is labeled "EMAIL" in a small, bold, black font, and contains a placeholder "Enter Your Email" with an envelope icon. The second is labeled "PASSWORD" in a small, bold, black font, and contains a placeholder "Enter Your Password" with a lock icon. Below these fields is a solid purple button with the text "Login" in white. At the bottom of the form area is a link that says "Create an Account!" in a small, regular black font.

The login page has been restyled to provide a clean and consistent user experience. The design includes the existing login fields and sign-in functionality while improving the visual presentation through layout, typography, spacing, colours and component styling. The design is visual only and does not change the existing authentication or session behaviour.

## Team Page

The team page provides information about the project team. Each team member is represented with their name, photo, role and short blurb. The layout is designed to keep each member's information clearly associated and readable.

## Visual Consistency

The login and team pages use a consistent visual design system, including:

- Consistent typography
- Consistent colour palette
- Consistent spacing
- Consistent component styling
- Consistent border radius and card styling

## Edge Cases

Edge Cases Considered The designs account for:

- Missing member photos
- Long member names
- Long member blurbs
